

Setting Up Application Environment

Docker Installation

Date	10 Nov 2022
Team ID	PNT2022TMID01237
Project Name	Smart Fashion Recommender Application

Step 1:

Go the official Docker website:

<https://docs.docker.com/desktop/install/windows-install/>

The screenshot shows the Docker Desktop installation page for Windows. The page is titled "Install on Windows" and includes a "Docker Desktop terms" section with a note about commercial use. Below this is a "Download Docker Desktop for Windows" section with a button labeled "Docker Desktop for Windows". The "System requirements" section lists "WSL 2 backend" and "Hyper-V backend and Windows containers". The page also features a sidebar with navigation links and a "Page details" section on the right.

Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

Step 3:

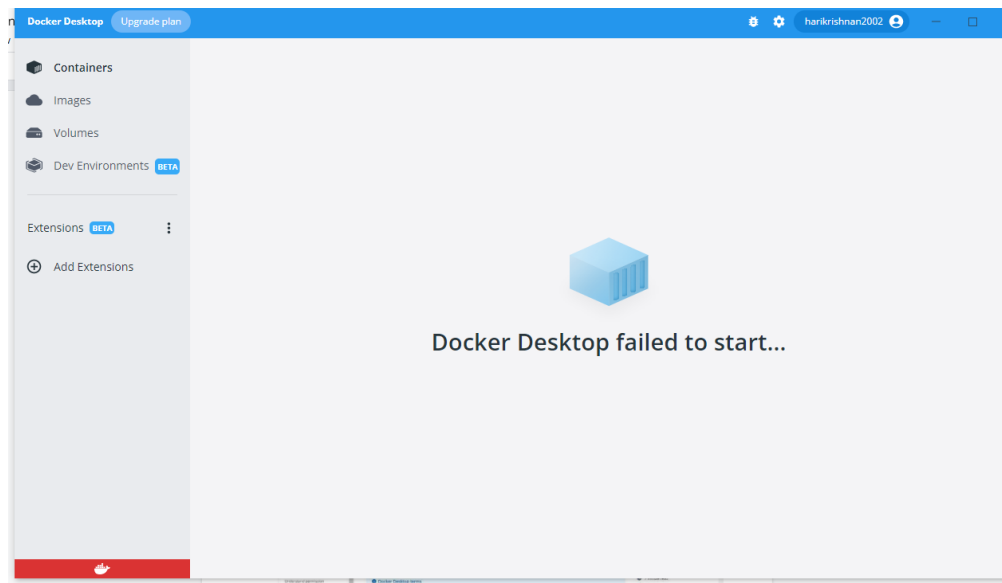

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

Step 6:

Finally, the docker is installed successfully.
